

## **ARACHIS ONLINE TRAINING**

### **MODULE 6: TOILET CLEANER**

#### **Ma ingredients anodiwa kugadzira**

125ml Sulphonic Acid  
250g Sless  
125g Salt  
3 Spoons Caustic Soda  
Perfume Lavender kana kuti Pine  
Dye (Blue kana kuti Purple)  
Bermacol (hafu ye sachet)  
4.5 litres mvura

#### **Instructions**

Isa 4.5 litres dzemvura yakachena mu bucket  
Isa Caustic Soda ne 250g Sless wokurunga  
Isa Sulphonic Acid wokurunga zvakare  
Isa salt wonyatsovhenganisa  
Isa perfume wosanganisa zvakare  
Chipedzisa nekuisa Dye

Kana zvadaro chimbosiya zvakadaro kwekanguva wozoisa muzvigubhu.

#### **ZVIKANGANISO ZVINOWANZOITWA NEVAKAWANDA**

Kushandisa Caustic Soda yakawandisa → toilet cleaner yacho inogona kukanganisa kana kukuvadza.  
Kuisa Sulphonic Acid usati waisa mvura → unogona kutsva paunenge uchidira mvura.  
Kuisa salt shoma kana kuti yakawandisa → yakawandisa = toilet cleaner inokoresa, shoma = toilet cleaner inoita mvura mvura.  
Adding perfume too early → fragrance evaporates or reacts with strong chemicals.  
Poor mixing order → leads to clumping, uneven texture, or unstable product.  
Not allowing mixture to settle → packaging too soon causes separation or weak cleaning effect.
