Includes: 10 kg professional formula, low-cost formula, premium formula, manufacturing procedure, usage guide, packaging guidance and business tips.

Training Document

Prepared for Arachis students and small manufacturers

Professional Chicken Spice Formula

This formula is designed for roast chicken, braai chicken, fried chicken, grilled chicken, chicken wings, fast-food outlets and spice manufacturing businesses.

The ingredients are practical for Zimbabwe and can usually be sourced through spice suppliers, butcher suppliers, supermarkets, Mbare Musika and wholesale food ingredient shops.

1. Main Formula - 10 kg Batch

Ingredient	Quantity for 10 kg	Function
Fine Salt	3.50 kg	Main flavour and flavour carrier
Paprika	1.50 kg	Orange-red colour and mild sweetness
Chicken Stock Powder	1.50 kg	Chicken flavour booster
Garlic Powder	0.80 kg	Savoury aroma and depth
Onion Powder	0.80 kg	Rounds off flavour
Ground Coriander	0.50 kg	Warm Zimbabwean-style spice note
Black Pepper	0.30 kg	Mild heat and aroma
White Pepper	0.20 kg	Smooth professional pepper note
Chilli Powder	0.30 kg	Heat
Turmeric	0.20 kg	Yellow colour support
Mixed Herbs	0.15 kg	Aroma and premium character
Ginger Powder	0.10 kg	Warmth and complexity
Sugar	0.10 kg	Balances saltiness
Cornstarch	0.05 kg	Improves flow and reduces caking
TOTAL	10.00 kg	Complete batch

2. Manufacturing Procedure

Step 1: Preparation

Ensure all ingredients are dry, fresh and free from lumps. Sieve all powdered ingredients before use.

Step 2: Weighing

Accurately weigh each ingredient using a digital scale. Accuracy is critical for consistent taste.

Step 3: Primary Mixing

Place all ingredients in a clean food-grade mixing container. Mix thoroughly for 15-20 minutes.

Step 4: Secondary Mixing

Pass the mixture through a sieve, then return it to the mixing container and mix again. This improves uniformity.

Step 5: Quality Check

Inspect for uniform colour, smooth texture, no lumps and no foreign particles.

Step 6: Packaging

Pack into 50 g sachets, 100 g sachets, 200 g containers, 500 g containers or 1 kg packs. Seal immediately to prevent moisture absorption.

3. How to Use the Chicken Spice

Application	Recommended Use
Roast Chicken	Use 20-25 g chicken spice per 1 kg chicken. Rub evenly and marinate for at least 30 minutes, preferably overnight.
Fried Chicken	Use 25 g chicken spice per 1 kg chicken. Add to flour coating or directly to marinade.
Braai Chicken	Use 20 g chicken spice per 1 kg chicken. Add a little cooking oil and rub thoroughly before braaiing.

4. Low-Cost Formula - Beginner Version

This option is suitable for tuckshops, market stalls and small butcheries where low production cost is important.

Ingredient	Quantity for 10 kg
Salt	5.00 kg
Paprika	1.50 kg
Chicken Stock Powder	1.50 kg
Garlic Powder	0.50 kg
Black Pepper	0.30 kg
Chilli Powder	0.30 kg
Turmeric	0.20 kg
Cornstarch	0.70 kg
TOTAL	10.00 kg

5. Premium Restaurant Formula

This version is suitable for restaurants, fast-food outlets, braai centres and premium spice brands.

Ingredient	Quantity for 10 kg
Fine Salt	3.00 kg
Smoked Paprika	2.00 kg
Premium Chicken Stock	1.50 kg
Garlic Powder	1.00 kg
Onion Powder	1.00 kg
White Pepper	0.40 kg
Black Pepper	0.40 kg
Chilli Powder	0.30 kg
Thyme	0.15 kg
Rosemary	0.10 kg

Mixed Herbs	0.10 kg
Brown Sugar	0.05 kg
TOTAL	10.00 kg

6. Storage and Shelf Life

When packed in moisture-proof packaging and stored in a cool, dry place away from direct sunlight, the expected shelf life is 6-12 months.

Important: keep the spice dry. Moisture causes clumping, mould and reduced shelf life.

7. Business Tip

A spice business becomes stronger when you offer several flavours. Consider adding chicken spice, beef spice, BBQ spice, peri-peri spice, rice spice and chips spice. This allows one customer to buy multiple products and increases sales per customer.

8. Packaging Advice

Use clean sachets or bottles, clear labels, manufacturing date, batch number, net weight and storage instructions. Better packaging increases customer trust and allows a better selling price.
