Affordable Toilet Deo Blocks Formula

This formula is designed for:

- * Low-cost production
- * Easy sourcing of ingredients in Zimbabwe
- * Strong fragrance
- * Good cleaning effect
- * Slow dissolving in the toilet cistern

These blocks can be sold individually in:

- * Tuckshops
- * Markets
- * Hardware shops
- * Wholesalers
- * Street vending
- * Combo packs with toilet cleaner

PRODUCT PURPOSE

Toilet deo blocks:

- * Freshen toilets
- * Add fragrance when flushing
- * Reduce bad smells
- * Help lightly clean the toilet bowl
- * Color the water (optional)

AFFORDABLE 1KG FORMULA

This formula makes approximately:

- * 20–30 small blocks
- OR
- * 10–15 large blocks

INGREDIENTS

Ingredient	Quantity	Purpose
Naphthalene flakes/powder	400g	Main deo ingredient
Camphor	50g	Strong fresh smell
Washing powder	200g	Cleaning action

STPP or Soda Ash	100g	Water softening & cleaning	
Pine fragrance	20–30ml	Perfume	
Color	Small amount	Appearance	
Candle wax/paraffin wax	150g	Binding & slow dissolving	
Blue dye (optional)	Small amount	Blue flush effect	

CHEAPER VERSION (VERY LOW COST)

If customers are highly price-sensitive:

Ingredient	Quantity	
-----	-----	
Naphthalene	300g	
Washing powder	350g	
Soda Ash	150g	
Wax	150g	
Fragrance	20ml	

This version is cheaper but:

- * Slightly weaker fragrance
- * Dissolves faster

EQUIPMENT NEEDED

- * Plastic basin
- * Measuring scale
- * Spoon/stick for mixing
- * Small molds or containers
- * Gloves
- * Pot for melting wax

You can use:

- * Ice cream containers
- * Yogurt cups
- * Silicone molds
- * Plastic takeaway lids

STEP-BY-STEP PROCEDURE

STEP 1 — PREPARE POWDERS

Mix together:

- * Naphthalene
- * Camphor
- * Washing powder
- * Soda ash/STPP
- * Color

Mix very well until uniform.

STEP 2 — MELT WAX

Heat the wax slowly until fully melted.

Do NOT overheat.

STEP 3 — ADD FRAGRANCE

After removing wax from strong heat:
add:

- * Pine fragrance

Mix gently.

Do not boil fragrance because heat destroys the smell.

STEP 4 — COMBINE

Slowly pour melted wax into the powder mixture while stirring continuously.

The mixture should become:

- * Damp
- * Moldable
- * Compact

Not too dry.

Not too watery.

STEP 5 — MOULDING

Press mixture firmly into molds.

Compact well so blocks become hard.

STEP 6 — DRYING

Leave blocks:

* 12–24 hours

until fully hard.

HOW TO USE

Place:

* inside toilet cistern

OR

* inside hanging toilet cage

When flushing:

* fragrance releases

* bowl gets lightly cleaned

ESTIMATED COSTING IN ZIMBABWE

Approximate small-scale production estimate:

Item	Estimated Cost
-----	-----
Ingredients	\$6–\$10
Output	20–30 blocks

Possible selling price:

* \$0.50–\$1 each depending on packaging

Potential revenue:

* \$10–\$30

PACKAGING IDEAS

Affordable packaging:

- * Small transparent plastic
- * Heat-sealed sachets
- * Sticker labels

Premium packaging:

- * Hanging cage pack
- * Printed ziplock packs
- * Branded boxes

Good packaging greatly increases perceived value.

IMPORTANT SAFETY

Naphthalene and camphor are strong chemicals.

Always:

- * Wear gloves
- * Avoid inhaling dust
- * Keep away from children
- * Do not ingest
- * Store away from food

COMMON PROBLEMS & SOLUTIONS

Problem	Cause	Solution
Block crumbles	Too little wax	Increase wax
Dissolves too fast	Too much detergent	Add more wax
Weak smell	Low fragrance	Increase perfume
Too soft	Excess liquid	Reduce fragrance or wax temperature
No cleaning effect	Too little detergent	Increase washing powder

BUSINESS TIPS

In Zimbabwe these sell well:

- * At bus termini
- * In markets
- * In hardware shops

- * Near supermarkets
- * Door-to-door

Best strategy:

- * Sell in packs of 2 or 3
- * Combine with toilet cleaner
- * Use strong fragrance
- * Use attractive packaging

Blue-colored flush water helps products appear premium.
